ARGUMENTARY

Organised within the framework of the institutional twinning P3A "Support to the Ministry of Higher Education and Scientific Research for the reinforcement of the pedagogical competences of the teachers-researchers and the governance capacities of the managers" (PAPERS) Ref: DZ 16 ENI OT 01 18, **the International Congress "Teaching for the future" will come to close this Institutional Twinning between Spain and Algeria (2019-2022).**

The objective of this scientific event is to spot the light on the training, exchange, partnership and collaboration actions, programmed over a period of 30 months, with 09 face-to-face sessions and 28, approximately, training sessions provided by more than 150 experts from Spanish universities and from which more than 2,000 Algerian participants (teaching, administrative and technical staff) have benefited.

The three stands of this project are dealing with the following themes: educational methodology, training of teacher-researchers and governance of the university system, constitute the framework of the Congress and the ideal canvas for the spin-off, conceived as a vector for sharing the skills acquired, consolidated or developed throughout the project.

The national and international scientific community will find in the Congress an adequate space to present, in echo to the activities carried out in the framework of the Twinning project, inspiring experiences, innovative projects, case studies, simulations and other pedagogical creations.

The conferences, communications, round tables and posters presented should be in line with the three strands below.

Strand 1: EDUCATIONAL METHODOLOGY

- Engineering of the training
- Construction of digital materials
- Creation of virtual learning environments (VLE)
- Educational innovation projects
- Didactic management
- Integration of ICT for learning and assessment
- Quality assurance

Strand 2: TRAINING OF TRAINERS AND RESEARCHERS

- Digital culture and didactics in initial and continuing education
- Innovative approaches and methods
- Designing/developing online courses
- Evaluation in e-learning
- Teaching/learning in hybrid systems
- Face-to-face and online tutoring

-Design of MOOCs

Strand 3: UNIVERSITY GOVERNANCE

- Career management / Student guidance systems
- Development of training offers
- Academic planning of internships (university/industry relationship)
- Employability, entrepreneurship
- Internationalisation, inward and outward mobility
- Personal/social development, inclusion and accessibility
- Monitoring of accreditation of diplomas and university services
